Campus Exchange

Concept

This local marketplace web app allows students to post requests or offer peer-to-peer services—like carpooling, tutoring, or tech repair—for small cash fees or skill trades.

Audience

University students seeking flexible income or affordable peer assistance.

Value

Creates a secure, localized micro-economy that solves immediate campus needs without relying on expensive external providers.

Profit

A small percentage-based transaction fee on completed cash payments.

Ai Features

A natural language matching algorithm that parses open requests and instantly notifies students with matching skills or routes.

FlowState

Description

FlowState integrates task boards, WBS, and Gantt charts into a single, seamless interface, enhancing productivity and collaboration for both individuals and teams engaged in software development projects.

Audience

User-friendly interface for all skill levels.

Profit

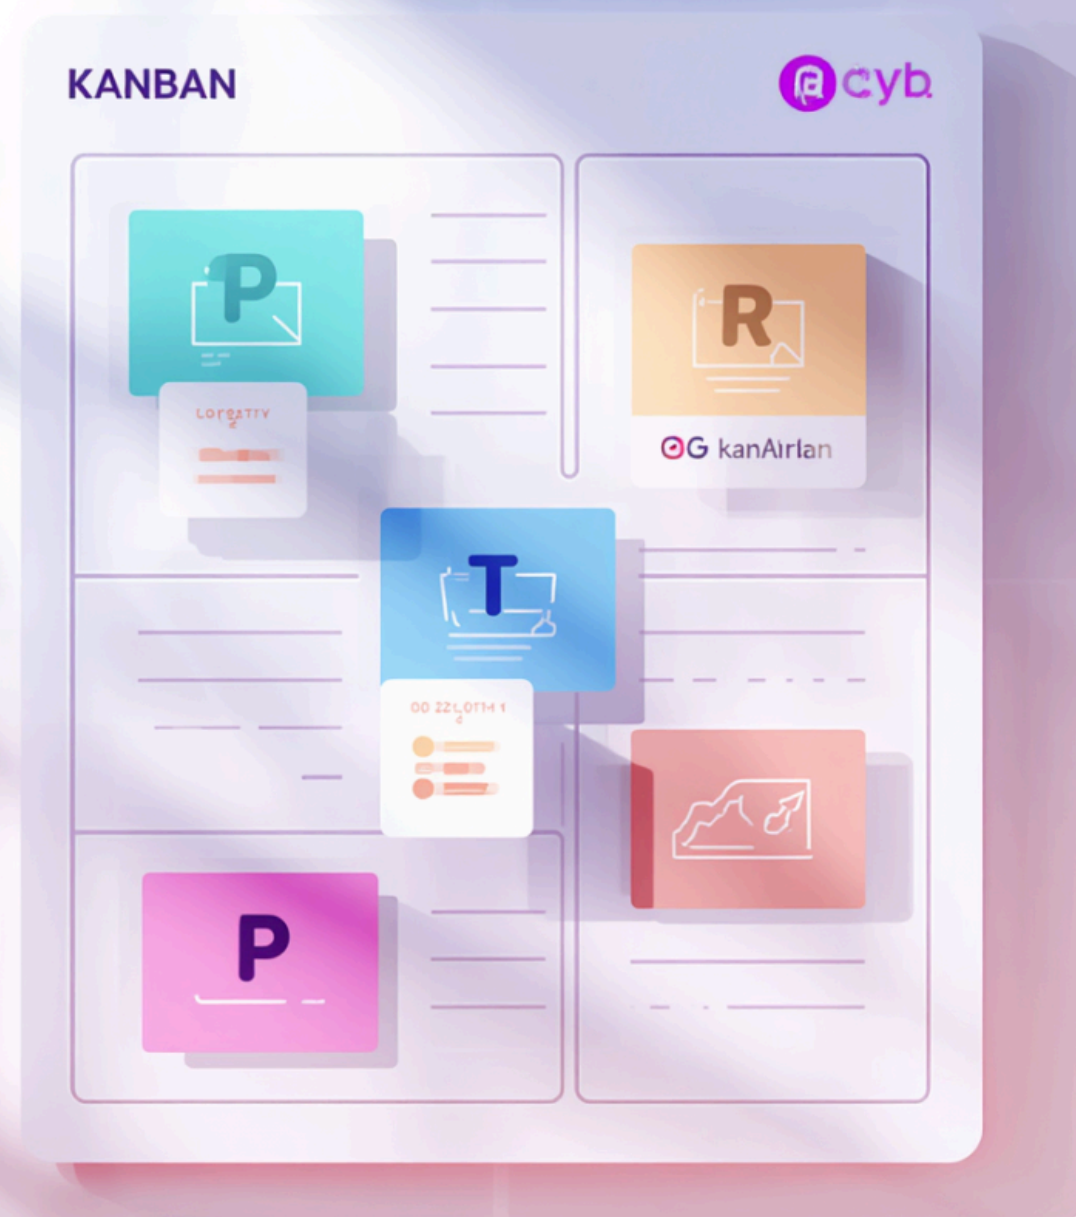

B2B collaboration tier charged per team workspace for larger group projects.

Value

Replaces the need to juggle multiple apps into a single, uncluttered interface.

Ai Features

AI-driven scheduling capabilities.

Quiz Generator

Description

This web app transforms PDFs into engaging multiple-choice quizzes, ensuring a seamless academic experience while enhancing learning efficiency for students and educators alike.

Audience

University students and educators.

Profit

Freemium model with bulk options.

Value

Eliminates the manual effort of creating study materials.

Ai Features

Integrates a natural language processing pipeline to extract key facts, generate question-and-answer pairs.
